

# **Tyre&Auto Southbourne Group Review: Easy checks on your vehicle can help pass its MOT test**

Tyre&Auto Southbourne Group suggests performing simple checks on your vehicle often so that when it goes through an MOT test, it'll surely pass. It is important to ensure that your car is fit to run and is road legal, so an annual routine health check is really necessary.

A simple step like checking the lights of your vehicle can be your first step in ensuring that your car will pass the test. All lights must be in good condition and should be equally bright. Touch the brake pad and check if the rear brake lights illuminate the garage door and if so, it's working properly. Flick the fog light afterward to determine if it's in good shape too.

Checking the tyres of your vehicle should also be done to make sure that it'll pass the MOT test. As much as possible, the tread depth shouldn't be below 2mm and if it is, replace the tyres in advance. Even if your vehicle passed the MOT test with that condition, the mechanic will still give you an advisory note telling you to replace those tyres soon. Tyre&Auto Southbourne Group needs you to remember that the tyre pressure should also be at the suggested level.

Also included in the MOT test is determining the safety level of your vehicle. It would be better to conduct some simple fixes on your car such as taking care of the windscreen wipers, rear view mirror, and the wing mirrors before the test to have a smooth process during the test. This is because the mechanic will also include in his test the safety of the driver side view.

It's only natural that dirty cars won't meet the hands of a mechanic often because some of them refuse to give service to such cars. Tyre&Auto Southbourne Group suggests cleaning your car inside and out beforehand.

Making sure of the good condition of your vehicle on a regular basis will help you pass the MOT test. Tyre&Auto Southbourne Group can also conduct an MOT test to your vehicle that includes the examination of both the safety of your car and the level of emissions released from the exhaust.

To save you from the worries of remembering, [Tyre&Auto Southbourne Group](#) also provides a free and annual reminder service for you and your vehicle. Each of its centers is accredited by VOSA (Vehicle and Operator Services Agency) and the staff members were all trained very well.
